Aseprite is a free and open source 2D sprite editor for Windows, Mac OS X and GNU/Linux. Its primary goal is to make sprites for games and artists. It includes tools to create the art from scratch, load and edit existing bitmap art, create levels and scripts, and export the work into several formats.... Anti-Theft System is the first anti-theft program to be able to sense and recognize whether your laptop is active or

KEYMACRO is a multilanguage (11 supported languages: English, Spanish, Italian, French, Portuguese, German, Russian, Czech, Danish, Dutch, Norwegian) system that allows you to program macros on your keyboard. There are two ways of adding macros to your keyboard, the first one is by typing the text for a macro directly into the program and the second one is by using the integrated scripting engine of KEYMACRO. What is interesting is that the keyboard buttons can be macros, too! Main Features: Programmable Keys: You can assign

keyboard keys to multiple functions, special characters, or even sequences of characters. Custom Macros: You can have as many macros as you like. To create a new macro, click the Add button and give it a name. Then, write a short description of the macro, enter the sequence of characters it will execute (up to 8) and press OK. Extend Keys: With this feature, you can add new keys to your macros or change existing ones by pressing a specific key. To add a new key press the button, enter its desired sequence, and press OK. If you want to change an existing key press the existing key,

select it, press the button, and enter the new sequence. Backup/Restore Keys: You can backup and restore any macros, so you can easily go back to your original keyboard setup if you decide to change it. Scripting: You can easily program any sequences of keyboard presses in to a macro. Simply enter the instructions as you would any other script, and press the OK button. KEYMACRO will then prompt you to assign a macro to the new script. Customizable: You can easily customize the macro names, the menu button, the keyboard buttons, the shortcut keys, the prefix keys, the

mnemonics, and all the other available options. Keyboard Requirements: At least one supported keymap (such as US or UK) must be active on your system. If you do not have a supported keyboard, KEYMACRO will recognize what keyboard you are using. Supported Models: KEYMACRO is available for the following models: - ASUS - ACER - Acer Aspire (P43, P44, ZG5, and V3 models) - FSC - PSC - Compaq - Dell - Fujitsu - Hewlett-Packard - HP - Sceptre - Compaq 77a5ca646e

Recent changes: - Optimized the speed of the recording and capture. - The errors for the files are now displayed instead of a memory warning. - The Clipboard Panel has been moved from the main panel to the bottom bar of the window. - Enhanced the settings menu, added items to it. - In the Settings window, the location of the shortcut for Clipboard Text Recorder has been changed. - Added the view of the last file to the summary of the files. This easy-to-use data recovery utility enables you to quickly extract a wide

range of files from damaged drives, optical disks, USB memory sticks and other removable media. Apart from recovering data and getting your files back into working condition, iZextract is also capable of fixing a wide range of problems on hard drives that may impair the functionality of your system. Description: GooTube Music Studio is a powerful audio recording, editing, and publishing tool for musicians, composers, and producers. Record audio files, add effects, samples, and instrumentals with perfect timing, then convert them to WAV, MP3, WMA, FLAC and OGG,

and burn them to CD, or upload them to the web. It also comes with an outstanding music notation and score editor, and is fully integrated with FreeTune. The app is also a very capable MIDI sequencer that lets you record and play back music on your computer. Description: FreeTune for Mac OS X 10.6 and later. FreeTune is the next generation audio player for Mac OS X. It's a whole new way to listen to your music. With FreeTune, you can use music to help you get ready for the day, relax at the end of the day, or find your way to the station. FreeTune is the best Music

(Currently, there are over 100 different radio stations in over 200 countries.) ◆ Browse through millions of songs: FreeTune also has over 11 million MP

Clipboard Text Recorder is a small software application designed specifically for helping you extend the functionality of your clipboard and work with multiple text items at the same time. Simple looks There's not much to brag about the user interface as everything is kept as simple and basic as possible. The main panel is divided into two main working areas, with the first one revealing the recorded clipboard entries while the second displays data stored within each item. Main features Clipboard Text Recorder offers support for an

automatic clipboard monitoring mode which makes the entire process seem nothing more than a child's play. You only need to save the desired text to the clipboard, and the tool automatically records the entry in the main panel. What's more, the app lets you delete the selected item or copy it to the clipboard, clear the entire workspace with just one click, enable or disable the monitoring mode, as well as export the information stored within a clipboard item to plain text file format. Performance Since it doesn't require much computer knowledge to work with this program,

even less experienced users can master the entire operation in no time. During our testing we have noticed that Clipboard Text Recorder carries out a task very quickly and without errors throughout the entire process. As it would be expected from such a small utility, it remains light on the system resources, so it doesn't hamper computer performance, nor interfere with other programs' functionality. Bottom line All in all, Clipboard Text Recorder proves to a simple software application that offers support for basic features for helping you manage clipboard data. On the downside, you

cannot use hotkeys, edit the text, and record images. --... 0 User Reviews Review: Clipboard Text Recorder is a small software application designed specifically for helping you extend the functionality of your clipboard and work with multiple text items at the same time. Simple looks There's not much to brag about the user interface as everything is kept as simple and basic as possible. The main panel is divided into two main working areas, with the first one revealing the recorded clipboard entries while the second displays data stored within each item. Main features Clipboard

Text Recorder offers support for an automatic clipboard monitoring mode which makes the entire process seem nothing more than a child's play. You only need to save the desired text to the clipboard, and the tool automatically records the entry in the main panel. What's more, the app lets you delete the selected item or copy it to the clipboard, clear the entire workspace with just one click, enable or disable the monitoring mode, as well as export the information stored within a clipboard item to plain text file format. Performance Since it doesn't require much computer

knowledge to work with this program, even less experienced users can master the entire operation in no time.
