Create Zips quickly. How to Create a Zip File? You can use ZIP archives for a myriad of purposes. You can use them to transfer large amounts of data in the form of files. Or you can send them via e-mail to others. As the names of the archive and its files are rather self-explanatory, even non-technical people can use the ZIP archives. They can create, edit and delete archives. However, ZIP archives are not self-explanatory. That's why you can easily create one using a utility called the Create-a-Zip utility. This utility allows you to create and edit ZIP archives with ease. As you may know, a ZIP archive is a very compact, compressed file. It compresses a large amount of files into a very small file. It can even compress and decompress files to and from an archive at the same time. What's great about ZIP archives is that they can be opened and used in a multitude of ways. They have portable versions of Windows and Unix that work without the need of an archive manager. You can, therefore, use a ZIP archive on your desktop or laptop in a way that other archive formats cannot. However, the biggest problem with ZIP archives is their size. It may take minutes or hours to compress a folder full of files into an archive. To make the whole thing a lot quicker, you can use a utility called the Insta Zip utility. This utility is designed to create, edit and delete ZIP archives in a much quicker way. Its interface is very intuitive and its interface is not so appealing. However, it is very intuitive and the usage doesn't pose any problem, even to beginners. The functionality of Insta Zip is pretty much the same as the one of the Create-a-Zip utility. It allows you to import large amounts of files into the application. You can then select the ones you want to include in the archive. You can then create, edit or delete an archive. The good thing about Insta Zip is that it doesn't include the option to add or create directories. This is a very common feature of the Create-a-Zip utility and it would allow you to easily use Insta Zip. However, Insta Zip has a few other features that make it stand out from other applications. Its interface is very intuitive. Therefore, it is very easy to use even for beginners. Insta Zip allows you to import various types of files into the application and you can easily select and include
