The Suite is a collection of programs that provide a way for you to create layouts. They are Adobe InDesign, Photoshop, Illustrator, and Fireworks. To become a photographer in today's world, you need Photoshop, so if you want to create a photo layout, you need these programs. The packages are set up so that you can create and edit anything from a book jacket to a billboard. As the name implies, they are designed to do this. Fireworks is a cross-platform editor that exports to web browsers and can be used for creating designs for the web, print, or interactive displays. Elements doesn't include a web browser, but you can use the browser that comes with InDesign. Vector graphics are found in books, on the Web, in print publications, and even on billboards. They can be used for logos, brochures, and even text-based designs. You can create text, borders, arrows, lines, shapes, ovals, rectangles, and many other objects. You can fill, move, and modify the layers. You can create shapes from a selection or freehand. You can group the various objects to create complex graphic designs. Adobe Illustrator can open files in Portable Document Format (PDF) and even allow you to edit PDF files directly.
