14 day trialThe Enron Oral History Project Continues... "Using History to Help Enron Become the World's Leading Company" How can an understanding of historical perspectives "give us an edge" on the competition? We are convinced that terms like "anthropology," "archaeology," and "psychology" are key to an Enron that is second to none. The Enron Oral History Project completed with the help of the University of California's Oral History Group, and an amazing team of researchers and students, provides some insights on the topic. But we need your help. Please use this link to read the complete transcription on the EnronOnline Intranet Site. Other Historical Documents: Analytical Framework: The Structure of Scientific Revolutions by Thomas Kuhn The Structure of Scientific Revolutions by Thomas Kuhn Kuhn: "Disintegration" and the Concept of Paradigm by Thomas Kuhn The Structure of Scientific Revolutions by Thomas Kuhn Thomas Kuhn: The Structure of Scientific Revolutions Kuhn explores the history of science by examining the process through which new theories take hold in science. He also examines the implications of science for theology and politics. The Structure of Scientific Revolutions Kuhn puts forward the revolutionary idea that science moves forward through a series of revolutions, punctuated by periods of normal science. In normal science, science is historically static, but in a revolution there is a dramatic change in the way science is done. In the revolutions Kuhn identifies, the most common outcome is the introduction of a new paradigm: a perspective on the world that changes the way we see the world. Paradigm and Revolution in the History of Science Kuhn shows that each revolution in science parallels the history of humanity as a whole. Kuhn therefore adopts an empirical approach, trying to make the history of scientific revolution a science in itself. The Structure of Scientific Revolutions Kuhn structures
