SRT to SUB Converter is a Windows-based tool that helps you convert SRT (subtitle file) to SUB (subtitle format) automatically. This tool doesn't need to be installed, and you can run it on any removable device. After launching this software, you'll be asked to choose an SRT file. After that, you have to select the frame rate that you want your subtitles to have. Finally, the program will create a SUB file that can be saved directly to your hard disk or uploaded to the internet. Features: - no need for an installation process - the program can be used from any removable device - easy to use - easy to convert - no need to have any external files License: SRT to SUB Converter is freeware and released under the GNU General Public License. Keywords: Experimental Escherichia coli DH5alpha host strains containing phage lambda prophage integrated into pHSL plasmid vector DNA are transformed into E. coli MC1061 host strain. The positive clones appear as blue colonies on MacConkey agar plates supplemented with 0.5% rhamnose and the phage is re-extracted and used to infect a fresh culture of E. coli MC1061 host strain. The effect of mutations in the host is to reduce transformation efficiency and phage infection, resulting in plating efficiency of less than 0.1%. Such a procedure can be used to introduce plasmids carrying genes of interest into Escherichia coli. Potential for bacterial translocation in free and prosthetic ureteral stents. A prospective study was performed to investigate the potential for bacterial translocation in patients with free and prosthetic ureteral stents. Patients with ureteric strictures requiring ureteral stents were recruited into the study. Patients were assigned to one of two groups, depending on the type of ureteric stent used: group 1, free polyurethane ureteric stents; and group 2, stents with either silicon or polyurethane cuff. Peritoneal cultures and stent tips were performed at the time of ureteric stent removal and compared with peripheral blood cultures obtained simultaneously. A total of 30 patients were recruited into the study. Fourteen stents were removed in group 1, and 16 stents were removed in group 2. Stent cultures were positive in only

all users. This paper considers whether the U.S. and its allies are prepared for the full consequences of their actions in the Middle East. We argue that Washington lacks the core capabilities, and that much of the rest of the world is not willing to rise to the occasion. The United States has committed itself to a number of interconnected, costly, and seemingly endless commitments that extend well beyond the national interest in achieving U.S. foreign policy objectives. Unfortunately, Washington has yet to develop a strategy to accomplish the many tasks ahead, and the United States is on the verge of embarking on a course that will set the stage for a major international conflict.

TEL AVIV, Israel – A spokesman for the Iranian Armed Forces' Intelligence Organization (IOI) has told a gathering of journalists that Tehran has offered the United States billions of dollars in exchange for the release of its citizens, including two American hikers, who were arrested on June 10. In an interview with IRNA, Brigadier General Hassan Ghazizadeh was quoted by the Iranian news agency as saying that in exchange for the Iranians' release, the United States "should give us Iran's hostages, including the American prisoners." "Iran has a big file of American prisoners," the general was quoted as saying. Two American hikers, Shane Bauer and Josh Fattal, were arrested on July 31, 2009 for allegedly crossing into Iran through the Turkish border. They were later sentenced to eight years in prison for "espionage" and "illegal crossing of the border," respectively.
