You can also use Photoshop for general experimentation with creating images and for simple color correction. Photoshop CS6: The big new features Photoshop continues to be a well-rounded Photoshop toolset, and the newest version, CS6, is no exception. Adobe introduced Photoshop into a cloud computing environment, changing the look and feel of the interface and the way that

---

Photoshop works with computers. This trend toward cloud computing allows you to take advantage of a pool of tools from Adobe using the cloud itself. You have the option of buying a standalone subscription or a cloud-only subscription. The cloud subscription for Photoshop is a good option for those with multiple computer systems because you can make use of it on any device that supports the Adobe Creative Cloud. Photoshop CS6 introduces a new focus on you, the user. The toolset is now designed around the needs of the user instead of previous versions that were not user-friendly and lacked functionality. When you start Photoshop you are greeted

---

with an About Photoshop screen with a list of the tools and an Edit Your Profile page. The links to the other programs in the Creative Cloud (see Figure 13-8) take you to the page that gives you the information you need to use each product. **Figure 13-8:** The new look of Photoshop's About screen. It's also possible to open multiple projects in Photoshop at the same time. The interface displays the names of the projects, enabling you to switch between them at any time. Adobe has included a new Refine Edge dialog that includes five ways to manipulate the edges of your images. You can Smudge: Use the selection tool to smudge

the edges of your selection. Eraser: Select the Eraser tool and then use it to erase what you've selected. Glow: Erase and fill the selection with a glow effect. Soft Edge: Create a soft edge around your selection. Highlight: Use the selection tool to select part of the object you want to highlight. Then use the Highlight tool to highlight that part. You can also use the Free Transform tool to distort the edges of your image. Photoshop CS6 is very easy to use. The learning curve is shallow. No matter which way you approach using the program, you always seem to be able to pick it up quickly. Editing images You can perform many of

Adobe Photoshop is widely available for the Mac, Windows and Linux platforms. However, there are no software options to edit photos with the software on the iPad, Android phone or other devices. The current version of Photoshop is Photoshop CC 2018. It is an update to the previous version of Photoshop CC 2014 and was released in the second quarter of 2018. It also supports iCloud for the first time, allowing for ease of access across multiple devices. If you are looking for alternatives to

---

Adobe Photoshop, you can try Microsoft Paint, Krita, or Photoshop Touch. App Features Adobe Photoshop is essentially a collection of programs that make up the program or software. There are features that are available in the different versions of the software such as Photoshop Elements, Photoshop, Photoshop Lightroom, Photoshop, and Photoshop CC. The major features of Adobe Photoshop are: The most common feature that is available in all versions of Photoshop is the ability to edit images. This includes basic changes like adding and removing tools and editing color levels. These features are also available in Adobe

Photoshop Elements. The next thing to consider is the Edit feature.

Photoshop CC 2018 has in-depth editing tools that enable you to change the brightness, contrast and many other settings. It is possible to use these features in Photoshop Elements, but not all of them. There is also the ability to create new images using the Design feature.

However, as it is not the most common feature, Adobe Elements does not have as many features as Photoshop. The Artistic feature is the last and the most common feature to consider. It allows you to create vector images. Vector images can be edited in Adobe InDesign. Editing Images Photoshop

The House of Representatives has passed the Veterans Job Creation Act (H.R. 1330), legislation that

---

would put additional resources into programs aimed at providing jobs to transitioning veterans. The bill was passed largely along party lines, with most Democrats in favor and most Republicans opposed. Republicans said the bill didn't do enough to slow federal spending or cut other funding, including defense spending. "This bill will allow our veterans to find jobs for the rest of their lives and live with the pride and dignity they deserve," said Rep. Bill Johnson (R-OH) during the House debate. "This is a bill with the first step toward job creation: putting veterans back to work." The Veterans Jobs Legislation Act offers funding to the departments of

---

Veterans Affairs (VA) and Labor for a number of programs that would help veterans find jobs. Funds would be used to help veterans apply for education grants, to help them get help from one of the VA's 38 field offices around the country, to help them receive training and education, and to help them apply for government jobs. The bill provides \$10 million to the VA for "preferred hiring practices" and would provide grants for hiring programs at the field offices. Also under the Veterans Job Creation Act, the administration could designate additional priority areas as national hiring zones. Currently, VA field offices are authorized to

---

award grants to help veterans start businesses, small businesses, and service organizations. The bill calls for the Veterans Affairs Department to increase compensation for jobless veterans, allowing VA to pay monthly benefits to veterans who are unable to find a job. Currently, veterans who are working but make less than \$16,000 per year may receive a reduced rate of compensation when calculating VA benefits. VA could also create a program to help veterans replace Veterans Administration benefits with benefits they can use to supplement their government job. The Employment Training Act of 2014 would require the VA to pay

---

for certain job training programs. The VA could pay for services such as job coaching, other career counseling, job search assistance, or education for entering a workforce, as well as courses that help prepare veterans to be workforce entrepreneurs, to start up a small business, or to complete business or other training. The bill also calls for the Obama administration to “identify and provide support for strategic partnerships” with business and industry that would further job training and help veterans. The bill would also set up a working group to
