Increasing Fidelity A few years ago a group of patients and doctors came up with a method to encourage public health. It was a simple, inexpensive and private method, they decided, to remind people to get health screenings. They called their system Hospital 2025. "The idea behind it is that the government may put in place a national health screening program," says Judy Silver, president of the nonprofit group Silver Shari, Inc. "You'll be able to get free health screenings. But they have to make sure there's a health plan that pays for them. So to get that protection, we have to encourage people to be screened." Silver and her team of about 30 people advocate for public health and train people to be community health workers. "My company, Silver Shari, Inc., actually began as an advocate for the homeless," she says. "We were on the street, talking to people and helping to find them housing." Silver Shari later expanded its focus to the community at large. "We started taking homeless people to the doctor and doing outreach to people who don't get health care," she says. "We were just spreading the word." Eventually Silver Shari organized on a national level, she says, and began helping people in their communities. Silver Shari's clients are families and individuals who are having a hard time getting health care. "The best way to look at it is that we're sort of taking care of people's needs so that they can take care of themselves," she says. No Matter Where You Are In addition to organizing with national and local organizations and spreading awareness, Silver Shari gives out "homes" to homeless people. "When someone comes to us and says, 'I'm homeless, I've nowhere to go
