All our games based on the concept of "Grass Cutter" can be played in three varieties depending on the chosen variant : MODERATED. THE GAMEPLAY IS HIDDEN - Race against other players, and see who's the fastest lawn mower in the competition. Start your lawn mowing business. Your goal is to make as much money as you can by growing and harvesting crops. From medieval times to the present, there has been a constant demand for this service, but in today's era, it seems that people are just too busy with every day life to tend to their yard. You have the chance to care for their yards and make them nice, however, they can pay you for that. You have to use your smart and creative ways of tending lawns and making crops grow. And, to help you better your chances, you have to try to get the most money from each crop that you grow. And that is what you have to take in consideration; you have to harvest the crops quickly, and get the most amount of money from each growing season. A crop that is harvested too slowly, will not yield enough money for you; you will not be able to buy enough equipment to get more crops and keep those crops in future seasons. What's new in Fabled Lands:

Concept: Trainers in F1 can now use the concept of 'Weapon and Armour' to train their pilots. The Weapons and armors used are shown in the above picture(click to zoom). You can use your weapons and armour directly on a pilot to fire it. But for BFTO it is mainly used in my game, mission training, tally shoot/score and when you go to a locker after a mission, ie, lockers on the ship with armors, etc. This also effects player death. If you are training for a mission without any armors, for example...you will die with you weapons. If you have an Armor, the pilot will exit with the armors on. Weapons can be damaged during training so if you take a fatal shot, the weapon will also be disabled for the remainder of the training....but the pilot can still use the armors. It just won't be available for the remainder of training. You can also 'Fast-fall' your pilot by setting the 'trigger speed' to 1...and the pilot will drop out without an armors. So think fast. Good Luck (Also...you can activate any weapon or armor instantly by recalling the training, ie, letting right click the target with the weapon or armor) - Fixed a bug where your weapons can damage the X-Trails, or other shuttles...This can happen when they collide directly. Now the X-Trail won't be harmed by your weapons. - Marksmanship: Add the same weapons and armors to the ranking list like in the actual missions. Like the other missions, some of the weapons can be

different depending on the difficulty level and mission rules. eg...Hawk's Lockers have the same names in Hard vs Easy when training. (You don't choose the mission depending on difficulty) - Training Multiplayer: You can now customize your "Training" multiplayer, these weapons and armors are just re-placed on your players stations. ie: You can play unlimited solo training by buying the weapons/armors with real money, or this is not fixable yet. So, the same weapons as [CHAMPION] and [LEVEL] are used. Multiplayer Training also comes with "restart" update. If you don't know what this is, you can find it when you log into Multiplayer Training. - If a character entered a 'Training' mission without tools, armors, etc, and you have this
