What's new in Fifa 22:

- **New Player Performance System:** - Complete Player Analysis: Scouted, summarised, and actionable data to help your players excel on the pitch - Improved Chipped Shots: Defenders will be more aware of incoming shots after actions have been completed - For example, a shot diagonally from the right-hand corner of the penalty area, will result in a shot taken at the feet of the goalkeeper.
- **New Player Experience:** - Stronger, more intelligent traits: For example, new attributes such as ultimate lean gain(push off) or energy recover(kick momentum) - Social Club Profile: Enhance players appearance/statistics through social media, such as posts on a club fan page. Clubs in the Premier League can earn £750,000 each year for sending the most photos to their fans' social media accounts.
- **New Team Tinkering System:** - New Strikers Costraint: Reduced captain transfer budget, restrict options on new signings. Reduce your goalkeeper trainer budget by five minutes. - New tactic sub-stages: An active manager can now choose from multiple sub-stages when constructing a new strategy within the new tactic sub-story. - Strikers improved in second half: - Goalkeeper: Picked up during stoppage time will now react more effectively to crosses - Defenders: Improved positioning on crosses, reduced need for close proximity and ball dominance - Midfielders: Shorter, higher ball flights - Full-backs: Improved positioning on crosses, more need for distance & less need for ball dominance
- **Season experience:** - Managers earn experience for every match they play. One experience point is gained for every minute of game time. It is possible to reach double digits in a short period of time. - Introduced a new system to accelerate the manager experience process which allows a manager more time to focus on their tactics.
- **Live Shot Statistics:** If a player receives a pass with the intention to shoot, then the stadium will be given a sound that notifies the start of the player's finish. - Ball Size indicator while changing shape: - Player Motion Prediction System (PMPS): - Players now react to passes correctly. - Improved accuracy of ball break-ins after a change of direction.

FIFA 18 is back! Enjoy All-New Multiplayer modes, Improvements, New Seasons, New Presentation and so much more! What is FIFA? For those not familiar with FIFA, it is one of EA's flagship sports titles and arguably the most popular sport video game franchise in history. FIFA is a squad-based simulation football game played on a virtual pitch with hundreds of unique player moves, formations, and teams. Created by EA Canada (formerly known as Polygon Entertainment), the game was first released in 1993 and has been updated and improved continuously over the years. The latest instalment, FIFA 18, has been released on October 27, 2017 on PlayStation 4, Xbox One and PC. FIFA 19 is the first game in the series to be released on the Nintendo Switch. It was released on November 23, 2018 in North America, November 27 in Europe and November 30, 2018 in Australia. FIFA 20 will be the first game to be released on the Nintendo Switch with a planned release date of September 27, 2020. A Look at EA Sports FIFA 20 EA is renowned as a world class sports video game publisher. In the last 10 years, it has expanded from its early roots as an EA Sports originator to a worldwide player, continuing to execute against its proven business model of creating, developing and releasing best-in-class games. In addition to its franchise titles, EA also develops games in genres such as driving, sports, and first-person shooters (FPS). EA has a proven business model in place for both "high-grossing" and "low-grossing" franchises. However, rather than focus only on expanding its existing franchises, EA is focused on developing "acquisitions." These acquisitions - basically acquisition of new franchises - are not dependent on EA having an existing franchise. A Look at EA Sports FIFA 20 EA has not only diversified its portfolio but also reduced the risk of new franchises by repositioning existing franchises and aligning new franchises with the overall EA strategy. In fact, in 2016 EA released new franchise DriveClub to high acclaim at E3 and at Gamescom. Drives is quite different from other EA games. The game involves driving and collision with cars from other players. It was a collaborative effort between EA Canada (the game's developer) and a German studio called Reflections Studios.
