### **What's new:**

**Model #29 (mcbride.com) This was the first of mine-sweeping models I made for miniatures. It is the basic model, with a single wire flexi-rope brush. It is far from pretty or sexy, but it does the job. It can be painted black or any number of colors, so don't be discouraged by its looks. It will sweep about 30 cm/1 foot of track. BONUS 9/24/09 Announcement: I will be posting updated size and scale (soooo faaaaaar above those wicked PS: 2mm or micrometer). The original design as built in 7.62mm with 2.5mm wire was pretty good. However, I needed to improve the width and length so it moves a little faster, so I made the wire thinner. Modification: I did not need the rails for speed so I cut them off. I also did not fit for the teeth on the standard tooth brush attachments. I made some hand-cut (about as thick as a pen blade, so tightly curled) teeth and an attachment spline. The base is a flexible plastic, covered (or I should say, applied) with some thin mosaic tile, with a groove running the length of the center of the base, the groove is**

plugged with drywall, and sealed with some gel dust...pfffffff! That's what the horses in Archaeology get. Science.\* \*Also: I discovered that I only had a few scales loose in one of the PVC plastic bases. Those that I did sew-on scale have no glue, and no screws. That's the downside of being a "Tinkertown" builder. I've been doing some modifications for the base of the model, so I'll be posting the new design soon. Oh well, I noticed I started this months ago at a 2mm scale that I was working on the whole time I built it. So it can always be argued that I'm "tinkering," it's impossible to know for sure until it's "finished." As I build them, I value them as more than just a paperweight (and yes, I do use them as those things, too, but not EVERY day). So far, in my research, I've learned that they are built as an Engineering & Manufacturing process. It was discovered way, way, way, way back that changes in heat expansion set the

It should be noted that it's pronounced "More-uh-Skay-Muh-Gee." However, the developer decided to go with "ma-sa-ki," the Englishized Japanese pronunciation. Murasaki Shikigami initially grew from the humble beginnings of a number of other titles, including a side scrolling shoot 'em up game called Yappy. In Yappy, there were references and quotes that brought a serious tone to the game, similar to Zelda. In fact, the expression "Yappy" actually came from one of the quotes. The quote, "If you can not change your destiny, then it is your destiny," was used in the shooter but had never been used in a serious context before Yappy. Upon release, the game received relatively good reviews from the press, but by then, the concept of Maasaki Shikigami was solidified. It would be a cult classic free-to-
