The scenario is on pages 3 to 52. The additional products will start at 3 and end at 14. The additional material is on pages 53 to 58. The scenario covers the following: Setting: This scenario is set in the Ancient Rome-like Fantasy Grounds campaign setting called Aegyptus. The Situation: The heroes are here to help the governor defend the empire against a Nubian invasion! The Nubians are mad, wanting to be free of Roman dominance and have sought to attack the empire by sea. Right now they are besieging the city of Swenett, the key fortress city for half of the Aegyptus campaign zone. The governor has called for help and sent out an envoy, with orders to immediately return to Alexandria with any help he can muster. Unfortunately, by the time the envoy got the word he was out of reach, the border guards were under siege and taking heavy losses. The Nubians took all the outpost towns, put their own garrison in Swenett, and have made it clear they won□t be leaving until the city is back in their hands. Note: (This scenario was created using the Savage Worlds set system.) How to Play: This module is a text adventure for

Vlov Round Announcements - 13 Character Set is a simple game that combines old-school RPG dungeon-crawling with the visual marvels of a modern genre. The story begins when a beautiful girl named Kaya became stranded in an abandoned cave and a mysterious man named Vlov suddenly appeared. The story, like Vlov himself, is pretty short but fascinating. Vlov Round Announcements - 13 Character Set features two characters: the heroine Kaya and the protagonist Vlov. They cannot move independently, and the game follows their journey in a series of randomly-generated events. You can only use the items and abilities that they acquire through the story. With over 50 cards, you can customize the battle system to your liking. [History] * Game introduction A new visual experience for the genre has been born. □Vlov Round Announcements□ is a simple, fast-paced RPG. The story begins when an ordinary woman by the name of Kaya became stranded in an abandoned cave. A mysterious man appeared and offered to escort her out. As they continued to wander through the cave, Vlov appeared. Kaya and Vlov cannot move independently, and the game follows their journey in a series of randomly-generated events. * Battle system Unlike conventional RPGs, the battle system in 'Vlov Round Announcements' can be customized according to the player's preferences. You can choose any of the the four upgrade slots on each unit (except for the character units) to freely attach cards. In this game, an active window featuring a card is provided for each of the three types of unit (character, standard and support). The active window can be opened and closed as desired. When a card is attached to a unit, the active window will appear over that unit. In this way, you can obtain information on the cards in the active window at any time. In addition, attack locations can be freely selected, and the orders of your units can be freely selected at any time. The bottom of the screen will display enemy attack locations and your attack paths. You can freely select the unit to attack, attack direction, number of times to attack, etc. * Characters [Character Unit] [Surge] [Tactical] [Support] * Character Unit [Character unit is the first type of unit in the game. The characters are strong and can move freely. [Surge] You can freely select how many times you want the c9d1549cdd

In the vibrant city of Kamurocho, criminals and perverts seem to have an endless supply of high-tech weapons. The streets run red with the blood of those who stand in their way... Especially young female delinquents. Enchained within a labyrinthian web of dark secrets, the fate of this female thief of the night hinges on her ability to stay alive and keep her heart clean. The world of YU-NO is a unique manga style 'fantasy-future' where magic, science, and technology exist side-by-side. The game is filled with several elements that will keep you absorbed in this exciting new universe. About This Game Hello everyone! It's been a while since our last post, so I decided to create a new one. I decided to create a console port of the game, but only 4 people from our team can do it, so there might be some issues. You can find the full version with all its graphical and gameplay features at the official website. We chose a strategy that involves a spy-like system and in which you become a kind of modder. You will need to find a way to repair the police's systems with YoRHa's skills. At the beginning of the game, the main objective is to reach the "Main Building" where the gameplay center is located. Using your skills and the materials that you find during your journey, you will be able to fix the security systems and obtain the "big red stick" needed to stop the evil that is taking over YoRHa's memories. This is the first prototype of the console port, and we know how difficult it can be to achieve a conversion in a game as big as YU-NO. YU-NO is a complex game, so we will try our best to keep the potential bugs to a minimum. For those who have not played the game, it is a Japanese anime/manga that makes your life a living hell by stealing your memories! And by the way, this is a Mature title! The gameplay features are as follows: -Over 100 different skills to improve in 5 different fields: Synthesis, Engineering, Science, Magic and Combat. -A girl that will help you and will provide you with hints and answers to solve the missions. -A skill tree system with a total of 3 branches to equip your skills, 3 different main technologies, and a
