Quake Online is a fast paced first-person action shooter title where teamwork, tactics and creativity are essential. Take control of elite special forces soldier, Kyle, who is equipped with an arsenal of weapons, grenades, and a grappling hook. Conserve your weapons and be a master at using all your equipment to complete deadly, high-speed takedowns. Easily collaborate with your team to pull off attacks no single soldier could accomplish alone. The destruction of the enemy is reward enough, but you will also have much more fun and survive longer if you choose to play safely and survive at all costs. Features -Replayability: Every mission is non-linear which gives players ample opportunity to try and master their favorite tactics and techniques. -Weapon Customize your character with over 50 weapon and with no-string attached support! -Action: Every single mission is full of action and shooting but it is the intricate planning and coordination that is the true difference between life and death. -Teamwork: The battlefield is littered with specialized traps and hidden dangers, so you need to work together to survive the mission and protect each other. -Capture the Flag: You can play in co-op mode with your friends in one of eight capture the flag modes. Earn points and upgrade weapons for the best overall team. Quake Online is a free downloadable game for PC, MAC & Linux. you will have to find on the way... How does it work? Block Layers The blocks are represented with circles (color of the circle is the same as the blocks are sorted by position. The goal is to reach a goal block which is placed somewhere in the top/bottom/left/right layer. Blocks are marked with a number which indicates their position (they form a chain). That is because only the position you are looking for blocks which have the same layer number. Blocks a Special Case The block is represented not only by the circle but also by the line of blocks. If there is one block below or above the current block then the line will be normal. But if it is on the left or right side then the line will be dashed. Enemies Every time you reach a goal block then you will find a new enemy. If an enemy is on the same layer number as the goal block then they will appear as the last enemy (as you can see here you can use a normal ladder to attack him). If the enemy is on the top, bottom, left or right layer, then he will be the new first enemy (as you can see here the enemy). Traps are categorized by layer. Trap kills the current block if you are close enough from it, if you are too close the block will not be affected at all. Each trap has a negative and positive effect, it's tricky to play the game! Controls and How to Play qop Only use the spacebar to move blocks (or use the arrow keys). The right arrow key moves the block to the right d41b202975
