[Latest-2022]**

A new age has come for civilization. In a free civilization, no one will be oppressed, no more matter the color of their skin. On its border stands a young brave man named David, who will have to fight for a new civilization in The Sojourn. Gameplay The original Sojourn did a great job of balancing puzzle gameplay, environmental design, and story elements into a procedurally generated, non-linear puzzle-platformer with a non-linear script. The sequel takes this same puzzle-platforming formula and applies it to an entire procedurally generated world! A compelling beginning as the game is played in reverse order, and an intense and dramatic ending ties the story to a puzzle-platformer. Features A visually stunning, procedurally generated world with a high degree of procedural generation and an emphasis on horror. Deep gameplay engine with a non-linear script, multiple branching paths, and critical decisions. Randomly generated puzzle-platforming with no hand-holding. Intuitive puzzles with a deep thought and puzzle solving process. Environment design and storytelling. Multiple endings, achievements, and a great music. When I first started playing this game I was more drawn in by its beautiful graphics than I was impressed by what it offered in the actual gameplay. After spending a few hours I noticed that the puzzles were fun and I was actually enjoying myself. I had never played a game that combined puzzles and story in such a way. I really enjoyed the story-driven puzzles the game offers and was a little disappointed that there was no way to replay them. I also found myself constantly on the edge of my seat wondering if David would survive, what he was going to face next, or who he would kill on this journey. I wouldn't recommend this game if you are looking for a really deep puzzle experience or a puzzle-platformer. If you're looking for something just for the fun of it, then I would recommend this to you. Gameplay The Sojourn story is built around a puzzle-platformer. David, a young and brave man, must journey across a randomly generated procedurally generated world to find a way to stop all the people from being oppressed. The story is told through his journals, which are randomized. As the game is played in reverse order, these random journals are read in reverse order. Each journal, which seems to be a diary, slowly builds upon the story and by the
