beaTunes 5.1.5 is a file manager program for Windows that has a 3D interface, that allows you to navigate in songs semantically, i.e. segment to segment. With

beaTunes you can easily find songs, albums or artists by typing a few characters (subjective terms) in the filters and then listening to the results on the computer. Once played, the music will be listed in the left side in order from most played to least. To perform the same actions for a selection, press the buttons on the top right corner of the program window to select the music and then press the play button (or press the play keys on your keyboard) to actually play the song or music. Every song can be played back in order, split into several segments or even as a live music broadcast. In addition, you can play while listening to music you are currently playing, which allows you to work with your music while you listen to it. If your browser is configured to use html5, the music can be played online. If the music is streamed, you can choose a position in the playlist and work while the music continues to play. Additional information can be found in the program's help file. In addition to analyzing the music, beaTunes can also be used to help you get to know your music collection. A. Every song, album and artist can be given a rating (This simply means that a few categories of the music can be ranked). With beaTunes you can also see and set your preferred order for the songs, albums and artists in your collection. \hat{A} . The program can be configured with the number of most and least played songs you wish to see in your collection. Every song can be analyzed and marked with its beats. A. You can set a different tempo for each of the songs in your collection, beaTunes can be used for playing, organizing and adding music to you iPod. A. Your iPod can be monitored live while you are playing your music on the computer. beaTunes has a support for AudioCDs, DVD and BluRay, and it can play back the disc. A. Your collection can be divided into different categories. A. Music also can be saved to the Hard Disc or burned to an AudioCD. A. Details about each song can be accessed in the program's help file. With beaTunes you can also add CDs, **DVDs**
