's Forgotten Conflict, America's Flawed Decision Introduction by Edward Morris For much of the world, the word "Mexico" does not carry with it the poignancy of Pearl Harbor or the even darker memory of the Holocaust. But not so for one anti-war author and historian, whose 1995 book, "The Passionate Attachment," was the third most-translated English-language non-fiction title in 1999. The Passionate Attachment: A Fifty-Year Affair Between the United States and Mexico, by Ramon Rivera Salinas, translated by Sonia Naranjo, with an introduction by Edward Morris. Inspired by a personal story of everyday romance with a young native-born Mexican national, Eduardo Rivera Salinas's book explores the wide-ranging and often misunderstood fallout that continues to this day between the United States and Mexico, half a century after "Mexicanization" was declared the new policy for relations between the two nations, and the Mexican War of Independence ended a half-century before, in 1821. At first, it seems that the renegades who ransacked the central city of Mexico in 1810-11, known to history as the "defeated" or "invading" forces, were largely drawn from northern states, such as Coahuila and Nueva Vizcaya. But after the declaration of independence at Tehuantepec in July of 1810, that assumption changes. While many of those who participated in the initial ransacking of Tenochtitlan in September of 1810 were from the northern states of Texas, New Mexico and Coahuila, many were also from the southern states of Mexico — often provinces adjacent to the colonial metropolis, Yucatán. Among the invaders were General Nicolás Bravo and the enigmatic Vicente Guerrero, both from the Yucatán. The ransacking of Mexico by the invaders led to a major divide in the territories of the newly established Republic: the federalists, or those who wanted to maintain the Spanish constitution for an independent Mexico; the centralists, or those who wanted to implement the Grito de Dolores ("Cry of Dolores"), the decree of independence drafted by Miguel Hidalgo in 1810. The federalists were defeated, though they prevailed in much of the north. This turned Mexico into a federation of three regions

Set in a dark and dystopian future, this is a cityscape that was meant for night time exploration. It's a large-scale set that includes lots of buildings, signage and pollution, which will be perfect for creating your own dark and heavy cyberpunk city. Our goal was to give the user as much flexibility as possible to create their own city within the framework of the setting. We decided to let them have their fun and do whatever they want, creating a variety of realistic looking structures and old machinery, but we also included plenty of neon lights and other fantastical details to keep it from being too realistic. The city is made up of carefully designed and broken tiles of decaying materials. The goal was to provide a wide variety of textures to both the large-scale set and the small, modular ones. So you can create a mad metropolis or just a rundown alley in the darker side of a dystopian dystopia. * Features > 5 sets of building components in two sizes: > 1. 6'x8' > 2. 12'x10' > 6 sets of decoration tiles: > 1.
