## NovaPDF Server Pro

\* Convert any printable document into a PDF file with just one click (print-to-PDF) \* Convert printable documents (text, graphics, vector or raster images, etc) into native PDF files \* High quality output with professional features \* Create PDF files from any type of Windows printable document \* Ability to open PDF files with the default viewer (e.g. Adobe Reader, Microsoft Reader) \* Use a custom PDF viewer - just specify the path \* Append an item to an existing PDF file \* Insert an item into an existing PDF file \* Download a PDF file to the desktop or to the network \* Edit PDF metadata and other properties \* Email PDF files with all settings, images and text per default \* Compress high color and monochrome images, change the color of text and graphics, split a PDF into several pages, align text and images, invert the text \* Copy and paste content from one PDF file to another \* Set up different PDF permissions (e.g. allow printing, allow editing) \* Password-protect PDF files \* Encrypt PDF files with a password \* Allow printing, extract images, text, or both, and print a PDF file with selected page layout and print settings (e.g. orientation, quality) \* Start page, page layout, page scaling when printed, magnification \* Automatic PDF open in the default viewer or send the PDF file with all settings via email \* Processing a PDF file may take up to 2 seconds \* PDF files that were created with other programs (e.g. Paint.NET, Microsoft Word) can be opened by novaPDF Server Pro with no problems (print-to-PDF) \* Built-in plug-in for Microsoft Office (Word, Excel, PowerPoint) enables you to export formatted documents to PDF files (print-to-PDF) \* Export formatted documents (text, graphics, vector or raster images, etc.) to PDF \* These documents can be opened with any PDF viewer (e.g. Adobe Reader) \* You can edit PDF metadata and other properties (e.g. Title, Author, Subject, Keywords, etc.) \* By default, novaPDF Server Pro will open PDF files in the default viewer. You can change this. \* Use your own PDF viewer (built-in or on-the-fly from the program) \* When extracting images from a PDF file, no

## What's New in the?

===== novaPDF Server Pro is a powerful PDF converter that creates PDF files from any printable document. It can be seamlessly handled by users of any level of experience. It can be accessed by running its executable file or by opening the 'Print' screen within any program that supports it. So, all you have to do is specify the output directory and filename, in order to proceed with the conversion procedure. But you can also append an item to an existing PDF file or insert it before the PDF, as well as enable the options to open the output item with the default viewer and to send it via email. novaPDF Server Pro may be set to stay on top of other windows. Additional features of the tool let you edit PDF metadata and viewer options (e.g start page, page layout, page scaling when printed, magnification) and graphics properties (e.g. compress high color and monochrome images, convert indexed images, text and graphics color). Furthermore, you can configure email settings if you wish for the app to automatically send the document via email when the task is done, as well as encrypt the PDF file by password-protecting it and by establishing document permissions (e.g. allow printing, editing, extraction). The straightforward program integrates a plug-in for Microsoft Office, has a good response time, quickly finishes a task and includes user documentation. We have not come across any issues throughout our testing and novaPDF Server Pro delivers PDF files with a good quality regarding images, graphics and the text layout. Print PDF version of any file in a machine with Win32 application.NET Framework 3.5,.NET Framework 4.0 or Mono. The program supports some other restrictions, such as: - All standard buttons and icons which are used in Print settings dialog are unavailable, including "Cancel", "Print" and "..." buttons; - The license key should be uninstalled before
