Stronghold Antivirus Pro 9.0.0.25 Stronghold Antivirus Pro 9.0.0.25 is an affordable and straightforward application that provides a real-time and on-demand protection against different types of viruses and malwares. It scans your PC using a methodical approach. It finds, eliminates and sends removal tips for potentially malicious items. Its accessibly and minimalist layout puts programs that work with such features as Internet connection and microphone on your Start menu, and other apps on the desktop. An intuitive interface to program functions lets you choose between them and customize the methods of scans in order to adapt it to your needs. Stronghold Antivirus also comes with a built-in scheduler that lets you to set when you want to scan. It will schedule a scan as well as look for updates. It is easy to handle and won't keep you waiting for long time when the program starts working. Additionally, the entire process of Stronghold Antivirus Pro 9.0.0.25 scans is quick, without consuming lots of computer resources. Various types of scans can be used: * Full scan: This scans the drive, user directories (including hidden ones) and system areas, and removes potentially unwanted applications or alerts you to installed software that isn't needed or that might harm the system. * On-demand scan: This scans program that require access to the Internet. The on-demand scan is a convenient way to perform a scan even without Internet access. * Deep scan: It is a manual scan, designed to find and eliminate more dangerous threats. It will delete programs found. * Speed scan: This scans programs and drivers that aren't considered as malicious. It won't detect any issues with your Internet browser and cache. Stronghold Antivirus can be scheduled to start and check for updates for you. It will also keep you informed about when the update is available. The program can detect the following types of threats: * Adware: Adware is programs that promote different products and services. Some software products can actively seek for personal information. The most popular is spyware. * Browser helper objects: These programs may behave like malware if they spy on you or collect information about your online actions without your knowledge. They may also be used to redirect you to fraudulent web pages. * Trojan: These

programs are potentially unwanted applications that may be detected as malicious or contains harmful files or programs. Some of them can do things that can harm

## Stronghold Antivirus (2022)

SurfPrivates is a modern web browser that empowers web surfers to protect their privacy online.
