What's new:

With the newly announced Xbox streaming service, you'll be able to stream not only your Xbox One games, but also your entire Xbox 360 library. This service certainly raises a lot of questions, not all of which are easily answered at this time. For instance, there's the issue of backward compatibility (as in, can I stream my Xbox 360 games to my new 360?), and there's also the cause of those backwards compatibility concerns: the fact that the Xbox One will be required to stream a number of different 360 discs in order to play 360 games. "Not all titles that are available on Xbox 360 will also be available on Xbox One," Microsoft stated back in November. "We will announce the set of the final cuts of games, both of the Xbox One and the Xbox 360, at a later time." Over the next few weeks, we'll learn the answers to some of these questions, all as a result of the recent announcement of the Xbox Streaming service. Backward compatibility During their announcement of the new Xbox One, Microsoft dodged many questions about which Xbox 360 titles the new console will run, even after that announcement. Now we know. Microsoft confirmed that around 2,600 Xbox 360 games will be available on the new Xbox One with backwards compatibility. This number is higher than what was mentioned at the original announcement of the console back in May, but at the time they only confirmed that the new console would support 48 Xbox 360 games - those that used the Xbox Live or Xbox Live Arcade services. According to Game Informer, the Xbox One backward compatibility list will include games from before 2011. This, understandably, has many wondering what Xbox games will NOT be playable with the new console. One of the listed games that will not be supported by the Xbox One is 2000's Balance of Power, which took the multiplayer online battle arena genre one step further, merging a number of elements into a fully customizable experience. This game literally (and I do mean literally) takes you through a number of scenarios and a progression of special weapons (including a jet, a flamethrower, and a bazooka) to traverse an assigned number of special environments. These are called arenas, and each one has its own character, set of rules, and pace for combat. In the mix are mechs, tanks, planes and ships. You can jump, dive, roll, crawl, climb,
