Everywhere we look there are devices, we carry them with us, we use them to communicate with everyone... A few years ago, most of this would have been unthinkable, today, not so much. I still remember my first mobile phone. It was a brick-shaped thing, awkwardly big and heavy, and I used it mainly for calls or SMS. When I got my first smartphone, I was truly surprised. It became so... -By now we've all seen pictures of the worst mass shooting in modern American history. The tragic massacre that resulted in the deaths of 14 and wounding of 23 people during a Halloween party in Dayton, Ohio, has fuelled a wave of criticism of the country's love affair with guns. -When an argument in Toronto last week turned ugly, a man fired a gun in the air and drove his car into a group of striking transit workers. -A young American couple were on their way to Niagara Falls in a pickup truck when they had their car struck by a driver believed to have been texting or using a cell phone while driving. It's a problem that's been around for many years - even before smartphones were ubiquitous. -Dennys b7e8fdf5c8

Requirements and features: Twomon PC Program is a desktop application that allows you to extend your computer's desktop and improve its usability when it comes to multitasking. Twomon USB (iOS) The app allows you to extend your Mac or PC's desktop through its iOS counterpart, which is also free. Once installed, you will be provided with an app icon within your home screen where you can slide up your thumb to reveal the extension. Using simple gestures, it's easy to operate the app and, hence, use the benefits of your dual monitor setup. Twomon Air (iOS) Twomon Air is a mobile app that requires a paid subscription. Once installed, the app will pop up on the main screen of the iOS device that is sending information to your computer, much like the dual monitor setup on a smartphone would work. Using a list of extensions and categories, such as Group and Workspace, as well as the built-in options of zoom in and out of the content and proper scaling, you can choose the things you want to see on your desktop. Dell's website and manuals are not helping at all. Where do I even begin? Aug 02, 2018 Amazingly, even after many years of using the Dell's website and manuals, it still seems like a mess. Where do I even begin? Answers: The software is available on the Download Center. Choose the link that is most relevant to your current needs. You will need a copy of the software which can be downloaded from the Download Center. The Program downloads quickly to your computer and installation is easy. It's normally installed in minutes. Software Engineer Aug 02, 2018 By: amartine Hi, I'm trying to install this on win 10, but I'm stuck. When I open it and then click on install I get: 'Device object or path not found' I did some research and looked in 'add/remove programs' and found one called Win10ToIpad. This is in the Dell system tools, and on pressing install it says 'a problem has occurred'. I tried uninstalling all Dell programs, and reinstalling that, but I still get the same message. What can I do? Thanks. Answers: You'll need to install the first available program from the Download Center. The program installs quickly to your computer and installation is easy. It's normally installed in minutes. We

Twomon PC Program is a handy desktop application that helps you create and extend your desktops when connecting your Android or iOS device(s) with your PC. It allows you to show your PC's screen on a second monitor, vice versa, or even extending your display with both your Android phone and PC using your single phone. And then, through its mobile app versions, you can exactly do the same. As mentioned earlier, this desktop app does not include any storage or social media tools. On the other hand, you can still use your mobile device as a remote mouse or keyboard, or use the zoom feature to focus on specific part of your computer screen, but there is a catch. The desktop app requires that your computer does not have a GPU (Graphical Processing Unit) and as most of us know, most desktop computers have a GPU. Dual monitor setup for PC and Mac via USB or wireless Twomon PC Program is an interesting piece of software which, alongside its mobile counterparts, allows you to extend your Mac or PC's desktop with the help of either an iOS or Android device. Before anything else, here's what you need to know: the desktop client, Twomon PC Program, is free, but you do have to pay for the mobile apps, on either one of the desired platforms. There's one more thing worth mentioning, namely, the fact that there are actually two separate apps for both Android and iOS, called TwomonUSB and TwomonAir. As their names suggest, one allows you to create a dual monitor setup between your computer and mobile devices via USB while the other relies on the more modern wireless technology towards achieving the same result. You'll be mostly using the mobile apps for your day-to-day activity and the desktop client for general tweaks The mobile apps seem very well sorted, with modern-looking interfaces that can be summoned by placing three fingers on your mobile device's screen. The nice thing is that you can either extend the screen or duplicate it, control your PC using via touch-based gestures via your mobile devices, as well as zoom in and out whenever you feel like. In the case of the desktop application, things are a bit more "static." Twomon PC Program sports a non-impressive yet fairly intuitive user interface, neatly

tucked within a compact main window. There are four noteworthy, self-explanatory menus like Home, Options, Display Settings, and Google Account. As you can imagine, the Home section is the place
