In AutoCAD 2017, these APIs are based on the Windows Presentation Foundation (WPF) and the ObjectARX class library (version 1.1). AutoCAD 2005 introduced the Graphical User Interface API (GUIA) to allow AutoCAD users to automate certain repetitive tasks by writing custom code. This API is no longer available in AutoCAD 2011 and later. A major overhaul of AutoCAD in AutoCAD 2015 removed the Graphical User Interface, and replaced it with the AutoCAD Application Programming Interface (API) instead. The Autodesk Exchange Apps (formerly Autodesk App Studio) allow for AutoCAD customization by building on top of the AutoCAD Application Programming Interface. By using scripts, a developer can directly access and edit the underlying file format used by AutoCAD. History The original VBA plugin, for AutoCAD 2002, was developed by the Autodesk Exchange team, using the ObjectARX class library, based on the Visual Basic programming language. ObjectARX has been developed for AutoCAD since 2002. Since then, AutoCAD has added many methods to interact with the Drawing, Viewing and Modeling session via the VBA and ObjectARX APIs. The ObjectARX class library is implemented in C++ and allows for extension, customisation and integration of AutoCAD functionality. In AutoCAD 2013, the GUIA (Graphical User Interface) was introduced to allow users to write custom code, similar to macros, for building customized features and integrating into the interface. The GUIA provides an interface that allows users to write custom code to integrate into the interface, without requiring the use of macros. It consists of a command tree. It was discontinued in AutoCAD 2015 and 2017. The Graphical User Interface was replaced by the AutoCAD Application Programming Interface (API) in AutoCAD 2015. AutoCAD 2005 introduced the Graphical User Interface (GUI) API to allow AutoCAD users to create macros in the Graphical User Interface. With the Graphical User Interface (GUI), a user can create code that interacts directly with the software, and that is not available by the API. The API is fully scriptable, and the scripting language is Visual Basic Script (VBS). In AutoCAD 2011, the GUI API was replaced with the AutoCAD Application Programming Interface (API). The API consists of classes for the drawing objects, and methods for the attributes ca3bfb1094
