If I am zipping a root directory, should I use the "MoveTo" flag or not? Does it really matter? A: If the only thing that matters is that the files are on the root, then if you don't have a directory named "Root" then you could just do this: `Dim dir As String = Server.MapPath("Root") MoveFiles("source", dir)` And the files would all be saved at the root location and then you'd have to move them where you

---

needed. If you wanted them to be saved in a subfolder of the root, then you could do something like this: Dim dir As String = Server.MapPath("Root\SubFolder") MoveFiles("source", dir) And the files would be saved in SubFolder under the root.

Depending on what you are trying to do, some of the other flags you can use are: Overwrite AllFiles You can play around with it and see which ones you want to use. Adult Content Warning KissOfLoveSDream's Live Sex Chat Room Hello everyone, this is Indian cam girl

KissOfLoveSDream here. I'm 26 year old Female speak English in the Indian live sex chat action.

I`m a super sexy girl. I love getting off and playing on cam. I also love to cum, because it`s fun. My
