The car is the perfect size for the space it is in, which is why it is so well suited to urban driving. It's not huge. The car is not heavy. While the E60 does have the broad style of the original, it does not weigh over 3 tons. It's true that this car is not as roomy as you'll get in a sedan with this size engine, but it doesn't feel as small as you'd expect. The seats are wide and comfortable. In the back the two large seats are usable as a bench, but are better used as a bench/bed combination. I love how the seats fold down, even with four adults inside. This makes the car even more of a living room and slightly increases the cargo room. The ride is firm and smooth in the back and very comfortable in the front. I love the steering and handling. It's very responsive. A light touch on the gas will cause the car to lunge forward, and a slight tap on the brakes will go to a halt. The transmission is standard BMW. It's smooth and responsive. Gas mileage is very good for the size of the engine. The BMW uses a single headlight cluster. The cluster consists of one bright headlamp and 3 daytime running lights. The cluster has a nice looking white face and a nice black grid looking pattern on the outside. The cluster remains visible even at night, and offers good protection against impact. The cluster is relatively small and sits high, so you can get it easily out of your way in the car. The driver's seat is driver side. The passenger's seat is front, and the rear seat is in the back. At the bottom left corner of the front glass there is a small recess. This recess is important when ordering the car. It's like the place where you touch the glass when using the armrest or the item that slides under the door. The rear armrest can be folded down, but it is not adjustable. A single small armrest is provided in the center of the back of the front seats. This armrest is not wide enough to fit someone sitting in the back seat comfortably. The front armrest is fairly large, but the seats on the E60 are set back so far from the steering wheel that it doesn't quite reach all the way. The door pockets are narrow and small, and are deep enough for a wallet, small phone and a couple of items. The back pockets are fairly spacious and have enough room c6a93da74d
