Endless World Hack

md: i believe in unlimited opportunities. i believe we are the only generation to have more options than we have ever had before. i believe we have the opportunity to make the world a better place. i want kids to realize their potential. the new endless earth is just about 100% done! it is fully playable and functional, but it still needs a bit of work. from now until launch day we will be working non-stop on it. however, we are still hoping for you to help us test it by reporting any bugs or issues you find in the github issue tracker. the best way to help is to submit an issue. i have a website that tracks the worlds military spending and debt, and i use it to make projections based on those figures. i track the amount of military spending going to the top 10 nations, and then i look at how they are using that money. for example, the us spends twice as much on its military as the next biggest spender combined, china and russia, spend even more than the next three nations combined, and still they have to use their money to buy arms from the us. they cant do it all themselves. we hope that hack will be a companion to the endless project. it will be a place where children can learn from real engineers. we have a few thousand students here at endless who want to learn to code, but they dont have access to the right tools. hack should be the place where they can get them. i dont care if a student is in kano or beijing or sydney. if they want to learn to code, they should have access to a

hack pc. we are in the business of producing technology,
not hardware. 5ec8ef588b
