Ezp 2010 Driver Win7 64bit 221

EZP2010 Downloading drivers and software... I had to download the driver for win7 64-bit from www.ezp2010.com 3 When running ezp2010.exe... Driver not found. Try restarting your computer and running ezp 2010 again 4. Error when starting ezp2010: "Unknown hardware" and "Unable to connect to printer". At the same time, the ezppro.dll driver from the C:\\Program Files\\EZP2010\\EZP2010\\driver\\ folder is installed. 5. In the printer properties window that opens, in the "Connection type" section, select "USB" and try to use this printer. 6. If that doesn't help, then try to install win7 64 bit driver from www. dd2bc28256
