players. join the ongoing battle to conquer the largest community of players on the web! grepolis is a game with a rich strategy, where players can build cities and armies that will be used in war with other players. just as the name suggests, grepolis is a game where you will be able to lead an army and take over your kingdom! grepolis is a multiplayer online strategy game where the main objective is to build cities and an army that will conquer and take cities from other players. in order to dominate your zone, it is recommended to form an alliance so you can cooperate with other players. depending on the amount of players and the number of cities built, it can take up to 2 years for a server to come to an end. grepolis is a really engaging and active game, as whether you are online or not, you can still be attacked and loose your cities to other players. depending on your opponent, the damages in terms of army and resources can be really impressive. if you like being woken up at 3 am, you can install an app on your phone that will notify you whenever you are attacked. however, as grepolis is still just a game, i suggest sticking just with the pc. as i mentioned before, the game is advertise as a free-to-play game, however, users can purchase gold with real money to make their lives easier. gold is an in-game premium currency which will give you great benefits over your competitors, such as improved building times, bonus when fighting other players, increased amount of resources, increased favour from the gods and many more. in the end of this short review, i highly suggest giving this game a try if you are into battles strategies and war games! it can really help kill

your time!
