RSForm Pro 1.4.0 Rev.45 For Joomla! 2.5 __FULL__

[Download](#)

in order to have the form data in the rsform!pro manage submissions tab, you'll need to update the rsform!pro source code. for that purpose, you'll need to open /rsformpro/admin.php. you'll need to find the following code block: other than that, it's a pretty standard job. i wrote a module for the joomla! community so you can install it in about 5 minutes, or just use the rss form pro menu item (see top right corner of page) but that doesn't do any csrf fix (although you can add that in your form). note: the demo on the site now has the rsform pro menu item disabled. i changed the code to disable the menu item. i forgot to enable it when i was testing it, and i'm not happy about it at all. the menu item is disabled only in the demo. this method is easy to use, but it can cause some issues when you have forms that are being displayed in articles, modules, menu items, etc. when restoring the form(s), the form id(s) can be changed due to the fact that if the same form id will be found on the new joomla! installation, a new id will be assigned to the imported form, thus rendering it to no longer appear in the content where it was referenced by it's old id. starting with revision 25, subscribers are allowed to purchase multiple ticket types in the same transaction. notice that you'll need to update rsform!pro and the rsform!pro - rsevents!

plugin to the latest revisions in order to use this feature. this method is easy to use, but it can cause some issues when you have forms that are being displayed in articles, modules, menu items, etc. when restoring the form(s), the form id(s) can be changed due to the fact that if the same form id will be found on the new joomla! installation, a new id will be assigned to the imported form, thus rendering it to no longer appear in the content where it was referenced by it's old id.
