**Type3 CAA V5 Based V5.1 For CATIA V5R19-R22 X86  
X64 \_TOP\_**

---

CATIA V5 is the leading CAD software solution for the development and the definition of the complete digital product model. As a modular solution, CATIA V5 allows customers to buy as much or as little functionality as required, supporting specific user profiles and engineering disciplines. The TYPE3-CAA for CATIA V5 based on the new CAA version 5 allows designers and engineers to bring in client logos and special characters into the CATIA and create customized product deliverables. It is fully parametric and associative with all other features of CATIA and can be used on all your CATIA products. With TYPE3-CAAs vectorization tools, Designers can bring logos and special characters directly inside CATIA. BMP, JPEG, TIFF, GIF, PNG direct imports in CATIA V5 / 3DEXPERIENCE. # Simple and quick vectorization with dedicated parameters: allowance, noise filtering, smoothing, sensibility. # Vectorization from black & white pictures or colour pictures. All extracted curves are usable through CATIA tools and construction tree. TYPE3 is a CAM and CAM project design feature for use in CATIA V5 and CATIA V5R19-R22. It allows the user to compute over components that can be used for size optimization, progressive creation, and documentation of assemblies. TYPE3: Digital prototype creation tool powered by the 3DEXPERIENCE platform, offering engineers solutions to all stages of the digital prototype generation process. Its innovative workflow allows rapid generation, installation, and management of 3D components. TYPE3-CAA, which offers CATIA V5 bundles through the first two applications of the CATIA Engineering Excellence offer, offers professional tools for

---

the creation of digital prototypes.
