## Trainer Resident Evil 4 V1 10 All 25

the third of the four movies that made up the fourth entry in the series, the fourth revolution comes hot on the heels of the first two movies (see resident evil: extinction and resident evil: apocalypse).

the plot revolves around the fbi discovering a new bio-weapon called the "residue," a deadly airborne pathogen that has spread out to nearly every continent on earth. everyone with a connection to the fbi or military, or anyone who flies, is now considered a potential threat and as a result, classified as being infected and needing to be quarantined. this new ability would present the newest challenge to the group of civilians who have been targeted and are trying to get home, and the new government agency is scrambling to find a cure, which means that the four main characters (leon, claire, ada, and chris) have a new enemy to take out. the most horrifically unique thing about the film is how it plays with the movie-going experience. resident evil: retribution very aptly takes place in the theater. for whatever reason, the game is completely unable to animate most of the characters on the left and right of the screen and it frequently cuts out the action scenes. the best way i can describe it is if you were watching it with the sound turned off. everything looks normal at first, but soon it begins to glitch out and everything starts looking really weird. it made me want to scream "shut up and let me watch the damn movie!" during the loudest action scenes. it also appears to have a constant background theme of elevator music like alias, which is kind of obnoxious. if you found the latter half of the game enjoyable, you definitely won't like this.
