Cinema 4d R10 Keygen;This application claims the priority of Korean Patent Application No. 2003-74990, filed on Nov. 10, 2003 in the Korean Intellectual Property Office, the disclosure of which is incorporated herein in its entirety by reference. 1. Field of the Invention The present invention relates to a digital camera, and more particularly, to a digital camera having an improved moving object separation function. 2. Description of the Related Art Generally, a digital camera collects an image of a moving object with a CCD (Charge Coupled Device) or CMOS (Complementary Metal Oxide Semiconductor) sensor. The image includes information about the position and direction of the moving object, but does not include the information about the shape of the object. Therefore, in order to reproduce the shape of the moving object, the digital camera requires a special moving object separation function. As a separation method, a 3-D camera approach method is well-known. In the 3-D camera approach method, various methods are used to separate the moving object from the image. A general method is to roughly separate a background by extracting a contour from the image using the histogram and to roughly separate the object by determining a region in which an edge line of the object exists. However, the 3-D camera approach method requires the additional process of roughly separating the object from the image, so that it is not easy to apply to the actual digital camera. Accordingly, an object of the present invention is to provide a digital camera having an improved moving object separation function. Additional features and advantages of the invention will be set forth in the description which follows, and in part will be apparent from the description, or may be learned by practice of the invention. The objectives and other advantages of the invention will be realized and attained by the structure particularly pointed out in the written description and claims hereof as well as the appended drawings. To achieve these and other advantages and in accordance with the purpose of the present invention, as embodied and broadly described, a digital camera having an improved moving object separation function includes a camera body, a lens unit, a driving unit, a memory unit, an operating unit, and a control unit. The camera body includes a photographing device, which senses an object and a CCD sensor to generate an image, and a moving object detection unit, which detects the moving object in the image. The lens unit includes a lens, which focuses the image onto the C

GeneratorQ: How to make the input field required (red text) on the form validation in Laravel? As you can see from the image bellow, the red text is not shown when an input is empty. I am trying to show it to all the fields as the default behaviour. So far, I

have tried this: { {

```
Form::open(array('class' => 'form-horizontal')) } } { {
```

```
Form::label('site_name', 'Site Name', ['class' => 'col-sm-3 control-label'])
```

```
} } { { Form::text('site_name', null,
['class' => 'form-control']) } } { {
Form::label('site_address', 'Site
Address', ['class' => 'col-sm-3
control-label']) } } { {
Form::text('site_address', null, ['class'
=> 'form-control']) } } { {
Form::label('site_city', 'Site City',
['class' => 'col-sm-3 control-label'])
} } { { Form::text('site_city', null,
['class' => 'form-control']) } } { {
Form::label('site_state', 'Site State',
['class' => 'col-sm-3 control-label'])
```

```
} } { { Form::text('site_state', null,
['class' => 'form-control']) } } { {
Form::label('site_postcode', 'Site
Postcode', ['class' => 'col-sm-3
control-label']) } } { {
Form::text('site_postcode', null,
['class' => 'form-control']) } } { {
Form::label('site_country', 'Site
Country', ['class' => 'col-sm-3
control-label']) } } 79a2804d6b
```
