DEKSI Network Administrator is a great utility for network administrators that permits advanced users to oversee and manage their network in an interactive working environment. It features tools to draw LAN maps with multiple hosts, view system information and generate reports. System Requirements: Windows 95/98/Me/NT/2000/XP1. Field of the Invention The present invention relates to a portable electronic device, and more particularly, to a portable electronic device with light emitting diode devices and method for driving the portable electronic device. 2. Description of the Prior Art Liquid crystal displays (LCDs) have many advantages, such as low power consumption, thin design, no radiation, and low electromagnetic interference. Most of today's TVs and monitors use LCDs. The LCD has been widely used in portable electronic devices, such as mobile phones, PDAs, and notebooks. FIG. 1 is a block diagram illustrating a conventional backlight module. As shown in FIG. 1, the conventional backlight module 100 is composed of a light guide plate 110, a light source 120, a reflecting sheet 130, a plurality of light diffusion sheets 140, a plurality of optical films 150, a housing 160 and a power supply 170. The light guide plate 110 has a light incident surface 112 and a light emitting surface 114. The light source 120 is disposed on the light incident surface 112 of the light guide plate 110. The light emitted from the light source 120 enters into the light incident surface 112 of the light guide plate 110. The light guide plate 110 includes a light diffusion portion 111 disposed in the light emitting surface 114, so that the light emitted from the light source 120 enters the light emitting surface 114 of the light guide plate 110. The reflecting sheet 130 is disposed on the light emitting surface 114 of the light guide plate 110. The light diffusion sheets 140 and the optical films 150 are disposed on the light emitting surface 114 of the light guide plate 110. The housing 160 covers the light emitting surface 114 of the light guide plate 110. The power supply 170 supplies power to the light source 120 and the reflecting sheet 130. The light guide plate 110 is usually made of a plastic material, such as polycarbonate (PC) and polymethyl methacrylate (PMMA). However, the light guide plate 110 made of the plastic material has an inherent disadvantage. In general, when the light guide plate 110 is exposed in the sun, its color may be changed after a period of time. As a result, the light guide plate 110 may appear whit

Anger and depression among dental patients has been poorly studied in Nigeria. This study was to determine the prevalence of anger and depression among dental patients and to assess the relationship between the two mood disorders. Fifty patients were included in the study, where a structured questionnaire was administered at the time of their first visit. Patients were given feedback on the results and follow-up was done after a period of time. The responses were analysed using appropriate statistical tests. Mean age was 35.9 +/- 9.0 years and the male to female
