Find It Pro Enterprise is a full-featured file/text searching utility that can easily locate files/folders across your entire hard drive or network drives. It can even locate text strings within a file. It is so advanced and accurate that you can locate your secret company information that you had hidden from other search utilities. It even locates text strings inside graphic files such as spreadsheets. This full-featured program also includes search log, database indexing, and the ability to build, manage, and sort customized advanced indexes. The indexing engine is the key component in Find It Pro Enterprise. This powerful search indexing engine creates a precise and precise keyword index of your data. It will even search inside a variety of file formats including spreadsheets, presentation slides, HTML, text files, HTML files, database files, and many others. The index engine comes with a number of advanced options that allow you to configure your keyword list to conform to the way you search and build your index. With a database of index entries for each item, Find It Pro Enterprise searches your files in seconds. The index can also be updated when the files and/or entries change. In addition to indexing files/folders, Find It Pro Enterprise also indexes all text strings found within files, even as simple as non-printable characters such as the high-ascii character "ä". The indexing engine can even search strings of Unicode characters found in files such as Japanese text, Russian text, Chinese text, etc. Find It Pro Enterprise is designed to work with all Windows operating systems. The program comes with a full set of options to allow you to control how your data is indexed and searched. You can even use the database index to build a file template that can be used to search for all or even only the files that match your search criteria. This allows you to customize your search results to only the items that match your specific search criteria. The program has a number of options that allow you to control the operation of the program. The program is designed to work in a Windows Explorer environment, however, it can be used in any Windows application. Features: Find It Pro comes with several features, including a full database of indexes, text search, secure client/server database integration, external database support, and a powerful search engine. Find It Pro Enterprise \* Create or update database indexes \* Quickly search any files or text strings within a file \* Find text strings inside graphic files \* Fast
