film, which was released in 2010. This theme includes wallpapers of the main characters of the film, such as Shrek, Fiona, Donkey and Puss in Boots, but also secondary ones, like the Gingerbread Man and the blind mice. If you don't want to include any of the images, the checkboxes available for the wallpaper can simply be deselected. Randomizing the picture sequence is also possible, by enabling the "Shuffle" option. Furthermore, you can choose one of the available picture positions. The images can fill, fit or stretch to cover the entire screen, or you can have them centered or tiled. However, given the wide resolution of the images, the last two options might not affect the picture position, unless you have a very big screen. Additionally, you can modify the time interval elapsed before the images change. Windows enables you to choose one of the preset values that start at ten seconds and go up to one day. On top of changing the wallpapers, the theme also modifies the window color, making it a custom-shade of green, similar to ogres' skin.
