If you want to contribute the weekly YouTube Patreon, please do so through my Patreon page: GitHub: Many of us use GitHub or other online code repositories. That makes it easy to share your code with your peers or make available to others who want to learn or modify your code. But, of course, making your code available can also be a vector for malicious activity. This is because your code will often be uploaded to a publicly-accessible code repository or published to GitHub.com without much thought or attention to detail. That makes it easier for others to use your code. But what happens when you unwittingly post malicious code to GitHub? Does it end up in the hands of cybercriminals? Most likely. But what can you do to ensure that your code does not become the tool of cyber criminals? There are many things you can do to make sure your code is not used to inflict damage to your system, to steal your personal information, or to enable cyber criminals to

Striked is just one of the multiple ransomware-type viruses on a list that seems to only get bigger and bigger with each passing day. As is the case with most ransomware, Striked encrypts data and demands payment in order to decrypt your files. If you've had the misfortune to see the "YOUR FILES ARE STRIKED!" message, then, before all else, it might be worth giving StrikedDecrypter a chance. As its name clearly states, this lightweight piece of software should help you decrypt the affected files and recover the data without having to pay a ransom. Novice-accessible ransomware decrypter That said, this is a fairly simplistic application that does not even require installation in order to get it up and running, even though, it's worth pointing out that providing it with administrator rights is in order. Considering its somewhat barren main window, it's no surprise that working with the app should pose no challenges whatsoever. Just select the directory with the affected files and click the Decrypt button from the lower-right side of the main window. Helps you avoid paying a ransom and decrypts file affected by Striked This particular ransomware appends files with the help of various so-called extensions. Having said that, it's important to know that the utility currently comes with support for the following extensions: nukem@mortalkombat.top, rap@mortalkombat.top, m.pirat@aol.com, duk@mortalkombat.top, jekabro@mortalkombat.top, Andrey.gorlachev@aol.com, chivas@aolonline.top, raiden@aolonline.top, and bitcoin@mortalkombat.top. If you're lucky and your files are marked with one of the extensions listed above, you should, at least in theory, be able to recover your files without much hassle and free of charge. Your best bet against the Striked ransomware All things considered, StrikedDecrypter is without a doubt a very useful piece of software that should help Striked victims recover their data without actually having to "support" the cyber-criminals by paying a ransom.Q: Having trouble with line spacing in math mode I am having a problem with the line spacing in math mode. I want to have a nice space between the equation and the right parenthesis (the right parenthesis should touch the equation).
