## **What's New in the UBCD4WIN?**

UBCD4WIN is a boot disk manager that allows you to create a bootable disk, repair, restore, or diagnose any issues your operating system might have. After a quick installation, UBCD4WIN will pop up in a centered window. Here you can build an ISO image by pointing to the Windows installation files and destination folder. In

addition, you can personalize the bootable disc by adding your preferred files and folder from a specific directory. The ISO image can be either stored on your local hard drive or directly burned to a CD or DVD. Burning is accomplished via a burning software suite of your choice.

UBCD4WIN also comes with various plugins that you can add, configure, enable, disable, and edit. To sum things up, UBCD4WIN is one of the most reliable boot recovery CDs on the market today.

It doesn't require professional skills and can be successfully used to fix severely crashed operating systems. Nonetheless, it only runs on Windows 2K / XP / 2003, which may cause its popularity level to decrease. Have Fun Q: SailsJS, ExpressJS and AngularJS: is it possible to send the route without the . and www? Is it possible to do this without using `express.static()` for www? I'm trying to serve an AngularJS app on an SailsJS backend with a subdomain (e.g. `www.app.com`) and I would like to make sure that the subdomain routing (e.g. `/contact`) is not hitting the AngularJS code. So is it possible to just tell SailsJS to serve up the AngularJS app without the `www.app.com` path, or do I need to explicitly route the subdomain separately (with
