I then put up a couple of in-depth posts highlighting the best and worst aspects of the app, and sources for further information on any topics the community wants shown. I want this to be a discussion rather than just a one-way recitation of the features and capabilities of the app. I'm still really new to this review of Photoshop, so I'm hoping I can help give the community something like the other reviews—a vehicle for collaboration between you and I to help make the app better.
