Simply click the \"Make a copy now\" button on the main screen of the program and select the folder you want to save the files in. Then click \"Save.\" If you're using the full version, you'll need to create a folder on your computer that is specifically for saving the files. This can be a location in your computer's \"My Documents\" folder, or you can create an \"Adobe Photoshop CS6\" folder on your computer. Either way, you should make a copy of the files before installing Adobe Photoshop. Once you have the backup, it's time to install the software.
